

Calculation has created their own manuals for extra support to QuickBooks users.

The first manual is called Set up QuickBooks Accounts which helps you to create your own company file, and gives all the help that you need to set up all the company details.

The second manual is called Working With Accounts which helps you to manage your company file, and instructions to work your way around accounts receivable and accounts payable.

The third manual is called Working With Payroll which helps you to manage your payroll in QuickBooks, with examples of pay runs and setting up employees.

Each manual is \$45.

(incl. GST)
